WHITE PAPER

This whitepaper constitutes a technical report of the business purpose, project functionality, and social value of the Boulpik Token. This document does not imply a prospectus, nor can any part of it be taken as financial advice. The whitepaper contains forward-looking statements (including but not limited to descriptions of the project's goals and further development), which are not to be taken as legally binding commitments by the team.

The crypto market constitutes a new and rapidly growing sector with many known and unknown risks. Boulpik and any of its affiliates will not be held responsible for any losses incurred through smart contract bugs, exploits, or other unforeseen risks. This whitepaper is available in English, Haitian Creole, French, and Spanish. The information contained herein may from time to time be translated into other languages or used in the process of written or oral communication with the public. During such translation or editing, part of the information contained in this document may be lost, damaged, or distorted. Boulpik cannot guarantee the accuracy of such alternative versions of the whitepaper. The accuracy of such alternative versions of the whitepaper cannot be guaranteed. In the event of a conflict between the original version of the whitepaper in English and its alternative versions in other languages, the English version will prevail.

ABSTRACT

Boulpik provides information regarding entrepreneurship, and financial literacy. Boulpik offers innovative solutions for users to achieve financial independence through options and crypto futures trading and create passive income through DeFi (Decentralized Finance) protocols. One of the critical services of the project is the Boulpik ecosystem (Mobile app, Academy, Discord group, Staking, Wallet), which is an integrated suite that combines data on the financial markets, educational content, social features in one comprehensive product.

The Boulpik ecosystem includes

- Professional trading analysis
- Community-focused social aspects
- Payment and transfer system
- Web Design and Digital marketing courses
- The mobile app will serve as an extension of the tools available on the platform, as well as offering additional features.

Boulpik is creating an ecosystem that will benefit both beginners and experienced traders in the financial market. Boulpik is a self-sufficient, self-financing project that receives income from its business model, namely in the form of subscription payments.

The target market for Boulpik is the new rapidly growing stock and crypto traders. The project's educational tools make it easier for individuals to start trading and provide them with all the information they require to confidently navigate the sometimes-perilous waters of the financial

markets by employing proper practices. The heart of the Boulpik ecosystem is the Boulpik Token – a token built on the Binance blockchain. The financial state of the Boulpik ecosystem has made the Boulpik Token a multifunctional means of payment with several utilities within the ecosystem. The token provides access to various premium features of the platform and the app, and it also provides opportunities for users to grow within the ecosystem.

INTRODUCTION

Boulpik token is the first tokenized educational and financial market built on the Binance network. Boulpik believes that blockchain technology plays a crucial role in decentralization, governance, finance, entrepreneurship, and education.

Blockchain allows making a secure transaction between two entities without having the bank as a middleman; the safety and transparency of blockchain is a meaningful change for business and development. The internet and blockchain are developing extremely fast; creating community projects that focus on the fundamentals is essential.

MISSION

Boulpik's mission is to develop a community and an ecosystem that creates a simple and efficient environment for successful entrepreneurship, and financial literacy. The project is committed to building a platform that will enable everyone - regardless of their previous experience or lack thereof – to take advantage of everything that trading, and entrepreneurship offer. While the project targets different development aspects, all parts are united by a joint mission which is to accelerate adoption and give everyone the chance to participate in this rapidly growing financial sector.

FUNDAMENTALS

Boulpik is the first tokenized educational trading, financial literacy, and entrepreneurship company base on the Boulpik Token. Boulpik Token is a fundamentally backed utility token that decentralized educational trading, financial literacy, and entrepreneurship; a reliable, fundamental, long-term project based on academic and financial values

Boulpik Token will create a bridge between the subscribers and token holders, where subscribers can directly benefit investors. Most of the services provided by Boulpik will be paid and settled in the native Boulpik Token. The apparatus means that the bigger the company scale, the more subscriber the company have, the bigger the demand for Boulpik as the traded token.

ECONOMIC MODELS

Boulpik's economic model is based on selling access to a set of proprietary educational trading and entrepreneurial services. Boulpik Academy and Boulpik Trading are designed in a modular way, this allows them to be quickly scalable. Boulpik operates in the largest and most successful sector; the financial market, which is a huge and predictable field with thousands of people entering daily.

CHALLENGES

The financial market has been perceived, especially new investors as unstable, unreliable, and untrustworthy due to an extensive amount of manipulated information which aims to mislead investors and traders. Considering the horrific crypto crash of 2018, and the stock crash of 2008. The public image of financial market has become perilous and full of malicious actors.

The financial market is quite hard to understand without proper guidance and education, especially charts which are a crucial tool in trading. Therefore, many new traders and investors end up losing money or blindly investing and having to rely on a lucky day.

These barriers only become more obstructed, especially in the crypto due to high volatility. New traders usually force to put together theoretical and practical information from a lot of diverse sources, without having a straightforward way to differentiate which sources are trustworthy.

SOLUTIONS

New investors may face different obstacles ranging from researching data to the actual trading process. Bouldpik Academy was put together by some of the most knowledgeable leaders in the industry covering everything that is important to know. The whole program was made to cater to everyone, from beginners to expert, thereby getting the community ready for real-life trading and investing. The Bouldpik Trading platform will make it possible for any members to profit from the expert knowledge of some of the world's top traders by automatically following their signal trades.

PRODUCTS

Boulpik Trading

Boulpik Trading is a community that focuses on providing stocks and crypto signals. The community also prioritizes long-term investments. Additionally, they offer services to help clients configure their wallets, exchanges, and brokers.

Boulpik Academy

Boulpik has developed an Academy suitable for beginners and those who want to expand their knowledge about trading and entrepreneurship.

Mobile App

A crucial part of the Boulpik ecosystem will be the mobile app, which brings everything that both novices and experienced traders need in one convenient place. The mobile app aims to create a comprehensive ecosystem that offers education and entertainment.

Staking Reward

The staking system which will give users the ability to stake their Boulpik Token to gain other tokens or more Boulpik Token in Returns through our sophisticated and innovative passive income reward system.

Wallet

While security is a significant concern, the team is also looking to develop a native mobile wallet app for the Boulpik Token. It enables users to safely store, receive and send their Boulpik tokens without relying on third-party wallet. The wallet is non-custodial, meaning that only the users have access to their private keys, making this the most secure method for holding and using Boulpik token.

NFT

Boulpik NFT will allow members of Boulpik to access upcoming NFTs.

TOKEN OVERVIEW

Boulpik Token is the basis of the internal economic system of Boulpik and is used to access premium services implemented on all the Boulpik platforms. They serve as a particular unit of account and are used to pay platform fees. Boulpik Token is a universal cryptocurrency acting as a medium of circulation in the internal ecosystem of Boulpik. Investors can also freely exchange it for fiat and other cryptocurrencies.

When creating the Boulpik Token smart contract, the team opted for a deflationary model, which helps ensure stable demand and rewards for early adopters.

TOKEN BURNING

One of the core developments of Boulpik is token burning. This means that Boulpik automatically burns a percentage of Boulpik Token received from membership fees and transactions. This process aligns the incentives of all the subscribers and Investors of the ecosystem and the token, since an increase in the number of users leads to increased deflation. Apart from this, there will be additional burn events carried out sporadically to celebrate major milestones in the project's development.

TOKENOMICS

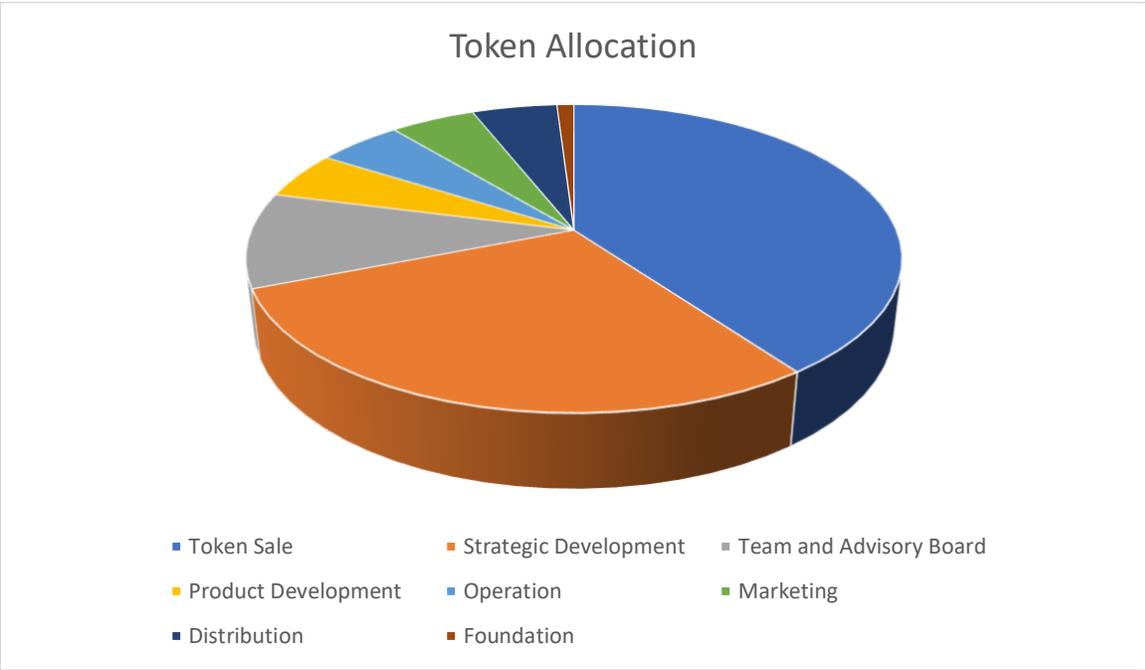

Token name	BOULPIK TOKEN
Symbol	BOULPIK
Total supply	100,000,000,000

The Boulpik Token is an internal unit of value that the Boulpik Ecosystem created to manage its business model.

TOKEN ALLOCATION

Token Sale	40%	The amount of token available for sale.
Strategic Development	29%	The amount of token available to be distributed to exchanges for liquidity and listing purposes.
Team and Advisory Board	10%	The Amount of token the core team will be receiving.

Distribution	5%	The amount of token said aside for airdrop, rewards etc....
Foundation	1%	The amount of token set aside for Bouldpik Foundation.

TOKEN USE CASES

Boulpik is building a global community that connects both investors and students, just like social media at the beginning.

Built-in Rights - Increased engagement and audience expansion

Boulpik Token as a **project services provider** - Members will have to pay a monthly, or yearly membership fee to access the Boulpik Trading and Boulpik Academy

Token as a platform management tool - Holding and staking tokens gives users the right to vote on governance proposals on the Platform and decide on the future developments of the project.

Token as an incentive tool. - All incentive payments and user rewards will be made in Boulpik Token.

P.S. The token does not provide ownership of the product, operational management rights, or platform's profit claim.

Token as money transfer - The structural element of the circulation system – An economy creation.

The token acts as a means of money transfer between USA, Haiti, and other Caribbean countries. To provide this function, it must have high liquidity and instantly exchange for any other cryptocurrency and (in the future) fiat currencies, natcash, digicash, and Moncash directly built-in Boulpik Wallet.

Here is the breakdown of the boulpik ecosystem functionality and utilities

1. A Web 3.0 Website/mobile app

Functionality

- a. e-learning platform where users will be able to access free and premium contents with L2E (Learn to earn). As the user watch the video contents, they will earn a reward
- b. The website and mobile app will be interactive (Social Media style) where users can post content, follow other members/add them as friends and be able to communicate with other members.
- c. Premium contents user will have to pay a monthly fee in fiat (USD) and must have a certain amount of our native token in their wallet depending on the package of choice.
- d. A built-in wallet where users will be able to safely receive, store and send Boulpik Token.
- e. Users with Boulpik token will be able to stake their tokens for a certain period of times and earn rewards.
- f. An NFT Marketplace where users will be able to buy, sell, mint NFT's
- h. Capabilities for users to be able to buy BTC, ETH, BNB, USDT, BUSD with their credit card, PayPal or MonCash

FUTURE DEVELOPMENT

Boulpik will establish an apparatus which will serve the community as an opportunity to start their blockchain projects whilst getting all the support needed. The Boulpik team will provide the development expertise, marketing help and all the knowledge needed to create a successful project.

CONCLUSION

Crypto and options trading have started to receive an unprecedented level of public attention in recent years. This brings a unique opportunity and challenges to the financial world. Bouldpik is singlehandedly placed to tackle these with its innovative approach to bringing everything that any trader or investor needs in one place. Covering from the basics of trading to the very advanced activities, the project strives to become the go-to place for every trader and investor.

Bouldpik's vision has expanded remarkably since the project was instituted, from a small copy trading platform on Discord to an educational hub and a DeFi project – all that without diminishing the original mission.
